Address: House 13A Eden Residencia College road, Lahore.

SUMMARY

Results-driven Senior Software Engineer with 4 years of experience developing modern web and mobile applications using ASP.NET Core/.Net and React/Next.js. Strong problem-solving, Team Collaboration mindset with a proven ability to deliver innovative, high-quality solutions in both frontend and backend development.

EDUCATION & TRAINING

MSc Information and Computing 2023 – Continued

The University of Greenwich , London, UK

Bachelor of Computer Science (4 years)

2018 - 2022

The University of Lahore, Lahore, Pakistan

Certification: Full Stack Web Development with Advance AI

PNY Training Institute, Lahore Pakistan

PROFESSIONAL EXPERIENCE

ACME ONE – FULL STACK DEVELOPER (Senior Softwar Engineer)

January 2025 - Present

Key Responsibilities:

- Developed and implemented enterprise business applications with scalable architecture using ASP.NET Core, ReactJs, and MSSQL in an Agile Scrum environment, collaborating closely with cross-functional teams to ensure timely delivery.
- Implemented responsive UI/UX with Material-UI/Tailwind CSS, building modular and reusable React components to accelerate development and improve maintainability.
- Created secure APIs using ASP.NET Core and Entity Framework, applying JWT authentication/OAuth and role-based authorization while following CI/CD practices for continuous integration and deployment.
- Designed and optimized complex SQL Server stored procedures and queries, implementing dynamic filtering and server-side data handling through AG Grid for improving data performance and scalability across large datasets.

Byte Impulse – Backend Developer

Sept 2022 – Dec 2024

Key Responsibilities:

- Mobile apps Production using c# .net.
- Develop and optimize 2D/3D mobile games using Unity and C#, implementing robust game architecture, gameplay mechanics, physics, animations, and UI systems.
- Design and maintain backend services and RESTful APIs with .NET Framework and SQL, including payment handling for subscribed users.
- Published and managed mobile applications on Google Play Console, ensuring production-ready releases and optimized performance.

PROJECTS

SUPERIOR SEAT LLC:

An e-commerce platform for a semi-truck company that enables users to buy and customize truck seats in real time through an interactive 3D model seat customization feature with their custom design.

- Responsive Front-end implemented using Next.js (SSR/CSR), Material UI, and Three.js for real-time 3D Model seat customization.

- Created Backend with ASP.NET Core 8 and database MYSQL with Entity Framework, applying JWT authentication and role-based authorization for access control .

Project Link : <https://superiorseatingllc.com/>

GENERAL STAR INSURANCE WEB PLATFORM:

A web platform for an insurance company that enables users to manage policies, claims, and workflows efficiently while handling large datasets.

- **Front-end:** Built responsive UI/UX using React.js and Material-UI, creating reusable React components for faster and maintainable development.
- **Backend-end:** Developed ASP.NET Core REST APIs with Entity Framework, implementing JWT authentication and role-based authorization. Optimized SQL Server stored procedures and queries with AG Grid server-side integration for efficient large dataset handling.

Aiim One:

AIIM One is a modern, scalable business management platform that integrates multiple enterprise applications — including finance, training, operations, and time tracking — into a unified ecosystem. It provides seamless user management, centralized dashboards, and robust security, all built for efficiency and modularity.

- **Frontend:** Built with React.js using a mono-repo architecture for multiple integrated applications.
- **Backend:** Developed with ASP.NET Core 8 using a multi-solution structure to support independent modules and APIs.

LMS (GLOBAL)-Intech :

A Leave Management System for a company with 4,000+ employees, built using .NET MVC and SQL Server, streamlining leave requests, approvals, and tracking for efficient HR operations.

Project Link : <https://www.intechww.com/>

Hour Hub :

A work hour tracking system that assigns tasks to employees and records their work based on timesheets, built using ASP.NET Core and Razor Pages for streamlined task management and accurate reporting.

Project Link : <https://app.hourhub.ch>

Squch App (Web & Mobile App Mern Stack):

Full-stack MERN application for event booking, live concerts, and real-time community chat. The platform enables users to discover events, book tickets, and interact with artist communities in a seamless digital experience.

DevOps Skills

Version Control: GitHub, GitHub Actions.

Microsoft Azure: Deployment | Azure Repos | Azure SQL Database | CI/CD Pipelines | Azure App Services

AWS: Static /Dynamic Deployment | RDS & S3 | AWS Code Pipelines | AWS Repos.

Technical Skills

- | | | |
|--------------------------|------------------------|--------------------------|
| • JavaScript /Typescript | • Clean Architecture | • React Js / React Hooks |
| • Next.js | • C# /.Net framework | • Redux-Toolkit |
| • Tailwind CSS / MUI | • Docker | • HTML/CSS |
| • SQL / SSMS | • Razor / Blazor Pages | • MVC /Web Api |

Language Skills

Native Language: Urdu

English : Professional Speaking
